

## AUTEC product range

Products for use in the following sectors: wind power, electrical engineering, control cabinet construction, cable assembly, railway, automotive, and construction.

Heat shrink tubing

Braided hose

Silicone & glass silk hose

Spiral & corrugated hose

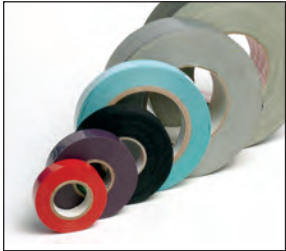

Insulating tube

Cable ties & accessories

Insulating tapes & protective films

Services

## AUTEC stands for

**Consistent quality** thanks to permanent contractual partners  
**High flexibility** & fast response times  
**Large inventory** = short delivery times  
**Expert advice** & implementation of special projects  
**On-site consultation** from our field staff  
**Approvals** UL, CSA, MIL, VG, Def Stan, VDE, etc.

## Our services

**Cutting** hose sections with very tight length tolerances according to specifications.

**Printing** shrink tubing using inkjet, heat seal, or thermal transfer printing.

**Custom-made** mini-boxes in special lengths or types. Packaging of sections in polybags according to specifications. Customized or neutral delivery packaging available upon request.

**Custom-made** heat-shrink tubing according to customer specifications.

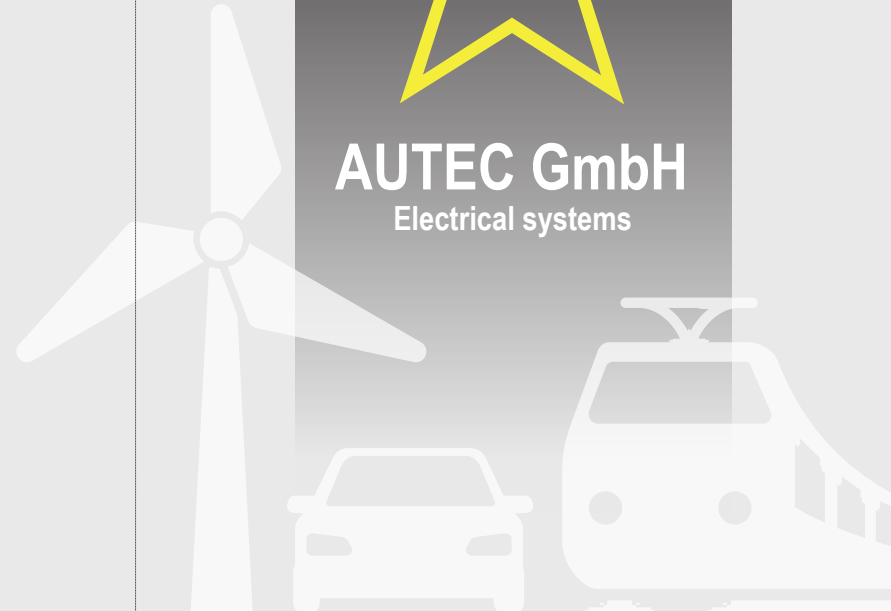

**AUTEC GmbH**  
Electrical systems

Your partner for heat shrink tubing, cable ties, cable routing, cable protection & cable marking

We are a distributor of high-quality cable-related products from the following companies, among others:

 **DSG-CANUSA** Heat shrink technology

**PANDUIT™** Cable management

**Nitto** Insulating tapes & foils

**EIPRESS** Contact pressing systems

„there's no end to what we cover“

with **DERAY®** heat-shrink tubing and molded parts in brand quality.

DSG-CANUSA is a leading German manufacturer of heat-shrink products.

AUTEC, in cooperation with DSG-CANUSA, supplies intelligent solutions for electrical and mechanical insulation and protection of components and cables for the automotive, rail, wind power, electricity, energy supply, electronics, and telecommunications sectors.

DSG-CANUSA manufactures heat-shrink materials made of polyolefin, fluoropolymer, elastomer, and PVC in thin, medium, and thick-wall versions, as well as shrinking machines and processing equipment.

For 70 years, Panduit has been delivering innovative cable management products that contribute to the lowest installation costs.

The product portfolio includes wiring accessories, cable ties, installation tools, cable conduits, and wire markers.

**Benefits of Panduit cable management products:**

Meeting the highest quality standards

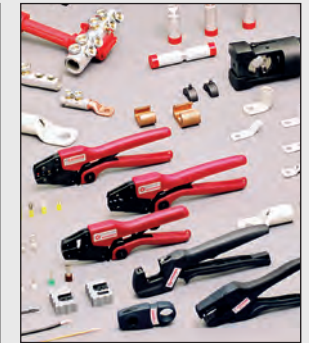

- Reducing installation costs
- Increasing productivity
- Focusing on core competencies
- Achieving the lowest scrap rates

Panduit's competitive advantage comes from rapid response to change, the highest standards, and the continuous development of cable management products.

Elpress offers electrical connection systems, system accessories, expert support and expertise specifically tailored to a wide range of applications.

Thanks to in-house product development and production, Elpress products meet the highest standards. Elpress products reach end users through established distributors.

Nitto produces electrical insulation tapes, surface protection films, EPDM foams, double-sided adhesive tapes, clean-room adhesive films, and glass fiber reinforced plastics.

Nitto products are often not immediately visible because they are often part of a finished product or because they are used as process materials during a production process.
